Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 6) ☐ Other:

1. The Examiner notes that applicants' amendment overcomes the rejection over Antonelli for reasons of record. As such, the Examiner updated the search and a new references, necessitating the following new grounds for rejection.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 13 to 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Kusakabe et al.

Kusakabe et al. teach a process for preparing (meth)acrylic polymers having either functional alkenyl or functional silyl groups at the chain ends. See for instance Examples 15 and 16. These prepare butyl acrylate polymers (meeting claims 17 and 18) having a dispersity within the claimed range (note particularly Example 15 which meets claims 14 to 16). The molecular weight of these polymers is within the claimed range. While Kusakabe et al. do not specifically indicate the number average molecular weight, one can readily determine (based on dispersity) that, in both of these polymers, the number average molecular weight will inherently fall within the claimed range.

With regards to claim 20, this step is shown in the examples noted supra. With regards to claim 19, while patentees do not specifically use the phrase atom transfer radical polymerization, based on how this polymerization is defined on page 13 of the instant specification, this is the process used by Kusakabe et al. Note for instance column 3, lines 55 to 62.
